afflicted may become a cripple unless by proper mechanical devices the arch of the foot is upheld for a time and the pressure on the heel from the weight of the body relieved. This very painful condition of the foot is often wrongly diagnosed as rheumatism or gout. The foot-rest will quickly relieve the pain and by retaining the bones of the arch in proper position, will eventually cure. Persons standing on their feet continually, or having to walk much, will appreciate this appliance as restful to the feet. Not being fastened in the shoe it is easily interchangeable, W. E.
